Forecast for Saturday 30 Apr 2022

Weather: Cloud thickening and lowering from the west overnight, bringing some patchy rain to far western ranges towards dawn. Overcast through the day with periods of rain soon extending from the west and turning heavy and persistent across western ranges. Gradually turning drier during the evening, but staying dull and cloudy.

Chance of cloud-free hill tops above 800m: 40% becoming 10-20% from mid-morning

Low Cloud and visibility: Moderate or poor in rain, very poor in hill fog with bases becoming from mid-morning extensive in the west and extensive or broken in the east from 600m with patches lower down in the west.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Difficult conditions as hill fog becomes extensive at height from mid-morning, while the strong, possibly gale force, winds bring a significant wind chill effect.

Forecast for Sunday 01 May 2022
Weather: Cloudy with patchy light rain at first, then gradually turning drier and brighter from mid-morning. Perhaps a few afternoon showers bubbling up.

Maximum wind: Variable 15mph or less.

Chance of cloud-free hill tops above 800m: By day 20% increasing 75% for the afternoon.

Low Cloud and visibility: Good, becoming moderate or poor in rain and later showers, very poor in hill fog with bases extensive at first becoming scattered for the afternoon from 600-800m.

Temperature: **Glens:** Plus 4 Celsius increasing 16 Celsius during the afternoon
At 800m: Plus 3 Celsius increasing 7 Celsius during the afternoon
Freezing level: 2000m
